Project Profiles

Project Details

TPO (Travel Price optimization)
Jul 2018 – Present

Role
Full stack Developer

Responsibilities

- Full stack web developer responsible for end-to-end web app development with Java and Angular as key skills with a team of 11 people.
- Designed configurable dashboard for serving all customer needs in one application named Calendar home.
- A plug and play dashboard designed to monitor nightly batch status. User can configure and monitor multiple database.
- Debugging the code to fix any product related issues.

Overview

TPO recommends optimal prices by analyzing the demand forecast, available inventory and competitor prices. The system provides pricing decisions based on holistic view of the market in order to maximize profits for both low and high demand periods by considering special events, seasons, holidays and promotions.

Project Details
